Leavenworth Prison Meeting

The prison expose meeting will be held in Leavenworth, Kan., Sunday afternoon, 2.30 o'clock, April 23d, at the People's Theater, at which time ex-Convict Me Donough will tell his story of the inside workings of the model prison of the world. He will be followed by ex-Gunard Zickgraf, who was discharged from his position by order of Attorney General Wickersham because he preferred charges of immorality and graft on the part of prison officials. Fred D. Warren, "near-convict," will also speak on federal judges and federal courts, and the methods employed to keep the prison houses supplied with victims. Many outside visitors will be present and it is expected that the opera house will be chowded to its capacity and then some. Tickets should be arranged for early. Every Attract reader in Leavenworth and nearby dities should be in attendance. Induce your contents are contents and the Appeal for 76 good Social-contents.

Of course, nothing like this is going to happen, because there is too much for the APPEAL to do. The APPEAL has years of hard campaigning before it.

Not Watered Stock

You hear a good deal of complaint about watered stock. But that is not the real trouble. The injury comes to the public not because stock is watered but because the profits are great on the price of the products. For instance Standard Oil pays a profit-a big profit—on \$700,000,000. although it has only one hundred million of capital and no bonds. It would not take any more from the public if it were "watered" for a thousand time as rauch as it now is. Every law that limits the earning capacity of a corporation really squeezes the water out of it, for its stock will be worth less and sell for less. When there is a panic in stocks there is really a squeezing out of water or the fear that it will be squeezed out. So the common people should rejoice at every pamic if they really want the water squeezed out of the stock market. Under Socialism big profit-on \$700,000,000, although it really want the water squeezed out of the stock market. Under Socialism there will be no stocks or bonds of any character, any more than there is in the postoffice department. That will make impossible the gambling in stocks and bonds and those who now get rich out and bonds and those who how get field out of such transactions will have to do some really useful work or starve to death. But you want the stock and bond system without its inevitable effect of the start want to the stock and bond system without its inevitable effect of the start want to the start fect of taxing you—and you can't have it. Will you never get wise enough to see that?

fect of taxing you—and you can't have it. Will you never get wise enough to see that?

Selling the Highways.

What would you think if the government were to sell or lease the public highways to some corporation, that was given the power to charge you a toll for using them, over the cost of maintenance? Whee! wouldn't there be a how!? The old guns and pistols and scythes would be burnished up, and the ropes would be gotten ready for the members of congress when they could be reached. And yet you have permitted this same thing in regard to the public roads most used—the railroads. These iron highways have been turned over to private corporations to take toll from the people. The dirt roads are of comparatively small use compared to the iron roads. Every article you produce, every article you consume, has been taxed by the owners of the iron highways. You would not permit the private ownership of the dirt roads, even if the owners would keep them in repair—but of how tremendously more importance to you would be the steep them in repair—but of how tremendously more importance to you would be the steep them in repair—but of how tremendously more importance to you would be the steep them in repair—but of how tremendously more importance to you would be the steep them in repair—but of how tremendously more importance to you would be the steep them in repair—but of how tremendously more importance to you would be the steep them in repair—but of how tremendously more importance to you would be the steep them in repair—but of how tremendously more importance to you would be the steep them in repair—but of how tremendously more importance to you would be the steep them in repair—but of how tremendously more importance to you would be the steep them in repair—but of how tremendously more importance to you would be the steep them in repair—but of how tremendously more importance to you would be the steep them in repair—but of how tremendously more importance to you would be the steep them in repair—but of how tremendously m and scythes would be burnished up, and the ropes would be gotten ready for the members of congress when they could be reached. Taft had discovered that 5,000 comrades of the Appeal Army had pledged themselves to each send five subscribers every week I spent in the Fort Scott jail. This would have brought in 25,000 subscriptions every seven days. These, added to the subscriptions picked up by the new workers and the casual workers, would have made a total of 25,000 to 40,000 subscribers per week.

Again the Temple of the Revolution is under fire. This time the shot and shell come from the office of the third assistant postmaster general. It has been some time since we heard from that distinguished gentleman. Perhaps no paper published is read so closely by the Washington officials as the Appeal. It was, therefore, inevitable that these watch-dogs of the masters' interests should take cognizance of what we are doing to secure justice for our wounded comrade, Frank Lane. As a result, the communication herewith printed was received from the Girard postmaster, quoting from a letter written to him by the third assistant postmaster gen-

The Advertisement is as follows;

"Count me in this fight against the Courts."

DEAR APPEAL; Here is my pledge to contribute \$1.00 per month in addition to my work for the Appeal, for a period of twelve months to the APPEAL'S LEGAL DEVENUES DEPARTMENT to fight the cases of crippled workingmen and women through the courts. It is understood that I am to receive one yearly subscription card to THE COURS NATION for each dollar contributed.

showing in so short a time. To increase the rate of subscriptions more than 400 per cent in two months' time is a circulation feat that no body of men, aside from the Appeal Army, could accomplish. Now note what happened: For the month following the postmaster general's edict, February, the number of yearly subscriptions dropped to 2,284—less than 100 per day. It requires 100 subscriptions at \$1 each per day to pay the current running expenses of the Coming Nation. December left us a handsome profit to put away for the Big Court Fight. February left us in debt. This information will no doubt be a sweet morsel for the politicians in Washington. It would seem that the new weekly magazine, the Coming Nation, has been making too rapid progress to suit the Washington gang-hence the above letter threatening to take away the second-class mail privilege of the Appeal's little brother. Our plan of giving a year's subscription for each dollar contributed to the Frank Lane defense fund did not meet with administration approval-honce this attempt to force us to abandon it.

The Appeal has already incurred several thousand dollars in obligations in the Frank Lane fight, and but for this postoffice order the Coming Nation would be in excellent financial condition to carry the case through all the capitalist courts. This does not mean that we are to abandon our crippled comrade to the fate of the thousands of unfortunates who are daily thrown on the scrap-heap. Oh, no-I simply pass the word on to the Appeal Army, confident that you will sign and return the pledge printed below, agreeing to secure one new subscriber to the Coming Nation each month for twelve months. This is the blank objected to by the third assistant postmaster general. An examination of the postal laws convinces us that we are acting clearly within our rights, and, therefore, we shall go right ahead with our plan. Its success depends upon your response. Let those who have already signed make their remittances promptly and let those of you who believe that men like Frank Lane who have been denied relief by the courts are entitled to some compensation for their injuries join the Appeal's Legal Defense League.

Is it possible that affairs have reached such a crisis in the United States that a publication is to be penalized because it dares take up the case of a miner lad who has been hopelessly crippled, with no friends and no funds except those raised

through the Appeal? How many of YOU want to be counted in this fight-not alone for Frank Lane, but for the 600,600 men and women who are annually slain or wounded on the industrial slaughter field? Yet not alone for these-but for YOURSELF and your wife and your children. It may be your turn, and would it not be some consolation to you to know that a determined group of your comrades had agreed to see that your loved ones were protected, and their rights secured?

This is the subscription blank objected to by the third assistant post-master general. He threatens to withdraw the second-class mailing privilege to the Coming Nation if the use of this blank is not discontinued. The APPEAL believes it is acting fully within the law in taking up the case of Frank Land and in increasing our subscription lisby this plan, and so we will go right ahead with our campaign in defense of the crippled industrial soldiers. If you want to help and at the same time shor these fellows in Washington that th APPEAL Army isn't to be bluffed, cut ou and return this blank

The Rent Note.

A friend sends the Appeal a "rent note" which would be a curiosity in many parts of the country, but which is common in Alabama and some other southern states. Thoughts on the Election.

The recent elections make clear the fact that the working people, more especially the labor unionists, are going into politics for themselves—and that accounts for the tremendous increase in the Socialist vote, for there is no other party that wants to give the workers what they have been demanding in their unions for the last forty years. I predict that in the next few years the labor unionist who is not a member of the Socialist party will be a rare bird. And when they begin to do this pretty generally the old party politicians will break their necks trying to legislate for them, hoping to stay BY J. A. WAYLAND that accounts for the tremendous increase in the Socialist vote, for there his no other party that wants to give the workers what they have been demanding in their unions for the last forty years. And when they begin to do this pretty generally the old party politicians will break their necks trying to legislate for them, hoping to stay the tide setting in for the new party.

For it must be true that whatever of change for good or evil, that is in store for the future, must come through the action of the citizens who are now republicans and democrats, for they are the great majority and nothing can be seen that the servert majority and nothing can be seen the great majority and nothing can be seen to the servert majority and nothing can be seen the great majority and nothing can be seen the great majority and nothing can be seen to the service of the whole American human being? Such asserting in prisonment his sentence would probably contain these phrases: "To lose all pay which may become due him, familiar to the workers.

It was Mr. Kauffman whose vivid expose of the White Slave Trade led to much of the present agitation against the law); to be dishonorably discharged from the service of the United States and to lose all rights of citizenship therein."

for the future, must come through the action of the citizens who are now republicans and democrats, for they are the great majority and nothing can come except through the majority. This will come just as soon as the people get wise to the game. The old party politicians would throw over the whole capitalist element tomorrow if they saw it no longer had the confidence and votes of the working classes, for without that vote they could not hold places of power and trust. They would be like generals without soldiers. They are self-seckers just as are all classes, and when they could not get power and place by supporting the rich they will desert them and go over to the poor. But they will never do this until the poor quit giving their votes to the old parties. Why should they? why should they?

Another thing that will help out our movement: Many thousands of people believe more or less in the principles of our philosophy, but they did not want to "throw away their votes," so they kept on giving it to the old parties, one of which always had the certainty of winning. Now, with our vote grown so large that it has an equal chance, these wavering votes will come over to us. How often has "I would-vote-with-you-if-you-had-a-chance-of-success" been lurled at you? The future looks bright, and our success is merely a maiter of a little more agitation and time.

The Coming Nation was fortunate in securing this story, and we urge upon our readers that they call the attention to their friends to its appearance in

It looked for a long time that the labor unionists would never do here as they have in Europe—use their ballots to get what they wanted. They have been led mostly by men who were capitalist-minded if not actually bribed by the employing classes. In France, Germany and Italy unionism is synonymous with Socialism. The men who compose the unions are the same ones compose the unions are the same ones that control the Socialist party, though the two are entirely seperate as organizations, neither invading the field ganizations, neither invading the neight of the other's activity. In this country the unions have fought the capitalists on the industrial battle fields—but voted for them in the political battles, giving the capitalists the control of the judicial, legislative and executive the control of government, and tive departments of government, and these departments have always, everywhere, been used against the workers and in favor of the capitalist's interests. All this is to be changed. When Socialists get control, the courts, the laws and the executive machinery will all be employed in the interest of the people who work at something useful for a living. Then they will not meet the policeman's club or the militia's for a living. Then they will not meet the policeman's club or the militia's bayonet, nor the judge's injunction to protect the degraded and deprayed hire-lings of the bosses when the real work-ers ask for more of what they pro-duce. They can win all just strikes then without starving themselves and their families.

Not only today, but all along the road of time, so far back into the dim past that the highway of human activities fades into mist, the working people have always been driven or led by the masters into doing the things and thinking the things that enabled the masters to rule and riot in uncarned lawyer. For not a single day could masters to rule and riot in unearned luxury. For not a single day could there be a master were the slaves not fooled into believing what the master would have them believe. "Slaves, obey your masters," has been pounded into workers from the day they were born until they were cast upon the scrappile of life. The ignorance of the mass is taken advantage of by the cunning few. Only a dolt believes that the tariff protects American labor! The same is true of the "gold standard" and other campaign guff given the workers to deceive them and the same as a life inture would be dark and uncertain. On the other hand the So-cialist party can only grow and thrive in proportion to the amount of sentiment generated by education and agitation.

A public opinion, hostile to the ownership of the means of life by this oligarchy of wealth, is rapidly forming. So great is this hostility that capitalism finds it extremely difficult to shape and control legislation. In this hour when this public opinion is being reflected in hostile legislation, capitalism relies upon the courts for protection. A little later, in the case of Warren, the United States court of appeals decided that he had no right as a newspaper editor to criticise the action of the sacred court—for that is really what it amounted to. So, a few weeks ago, the court decided in New York, in reference to the protection of human life through a workmen's compensation law, that the property of capitalism is sacred, but the life of a workingman is cheap, and his injury of little moment. A Socialist Congressman

BY LOUIS KOPELIN. Washington Correspondent APPEAL Washington, D. C.—As I look down on the floor of the house of represenwashington, by the house of representatives from my seat in the press gallery my eyes naturally wander in the direction where Congressman Berger sits. I see that he is drinking in every word that is uttered; watching every parliamentary move that is made. Berger is learning the game. He wants to know the tricks of warfare before he begins to fight. He knows that the politicians are shrewd and cunning, and have become veterans in the political army of plutocracy. So Berger is waiting and watching.

Berger has done so.

The better element of Washington, those who are not plundering the national capital, have succeeded in their agitation for the placing of Berger on the Committee on the District of Columbia. One of the advantages of having a So-cialist in congress is the amount of free publicity we are able to get for our cause. Everything Berger utters now regarding national questions is eagerly grabbed by a score of newspaper cor-respondents here, who then wire to all the newspapers in the land. The So-cialist position on the Mexican situa-tion was published in nearly every news-paper through the introduction of Ber-ger's resolution in congress. But the resolution was only the opening of the resolution was only the opening of the war against war.

From San Francisco Call.

If we might suppose that a dozen years ago a city of the high intellectual plane and moral standing of Berkeley had, elected a Socialist mayor, the country would not have known what to make of it, and the people who go off half cocked would have denounced the town as inhabited by a population of long-haired cranks, multifariously bewhiskered. But nowadays the announcement of Dr. Stitt Wilson's election to be mayor of Berkeley causes no more than a mild thrill of surprise. It is not revolution, but experiment. Berkeley, like Milwaukee, has been ocnverted for the present into a political laboratory, and her neighbor cities will watch with unaffected interest the workings of the process.

It Means Much

From Free Press, Ventura, Cal.

Some people are trying to belittle the victory of the Socialists in Berkeley. But stop and think how impossible would have been a Socialist victory in Berkeley a few years ago. Berkeley is a center of education and learning and intelligence and it is just as the Socialist has all along predicted, that when Socialism comes it will come through this class for the reason that the poorer and uneducated classes do not understand. It will not do to attempt to stop-the spread of socialistic tendencies by belittling Socialism. Every Berkeleyite who voted for Stitt Wilson knew just what he was doing, for Wilson did not seek to office under false pretenses.

The large Socialist vote is a warning to
the republican party leaders and manipulators, that they are not merely driving
voters to independence of action in scratch

Forced to the Front

From Astorian, Astoria, Ore.

The rise of the Socialist in America has been very slow, yet there has been a sureness about it, even in the abstract, that tells of the influence they are swinging and the positive effects they are achieving in the minor councils of the nation. The law of growth, the rule of adoption and the yearning for better things, are inevitable yearning for better things, are inevitable yearned by forcing the Socialist to the front and the leverage of his plausible theories of government, if not their logic, will keep him there.

The Bulletin of Honolulu raises a howl against this "recruiting of labor, calculated to "create a serious industrial crisis in Hawaii." The railroads take from the postal revenues about fifty millions a year for hauling the mails, and the express com-panies take a hundred millions a year of revenue that should go to the postal funds. It is the private ownership of the express that has prevented nostal system of this country from mak-ing many millions of profit annually. It is the influence of the express and railroad companies that has prevented the government from giving the people parcel rates like Canada and all other than ours, and it makes a profit annually, while it serves a far more scattered population over an area almost as large as the U.S. Our corporations more profit out of you because our government refuses to protect you and serves them, not you.

Which brings wishes on any matter, and are thus kept ignor ant of public sentiment. It is n o t certainly known just how many people de-sire public own-ership of rail-roads, express or telegraph. same election who did not want that done—and they didn't get what they voted for. Funny old world, this.

You can have public ownership railroads and express whenever you will give give your votes to thus. But you conwhenever you will give your votes to men who taunt it thus. But you continually give your votes to men who do not want it and say so. If your government can be trusted to "comitoi" railroads it certainly can be trusted to operate them, for it would be easier to operate them than to try to control them while recognizing that they did not belong to the public. The government has little trouble about controlling the rates and management of the postal system—and what little it does have comes from the owners of railroads and express that do not want the public to

Which reminds me that ideas con trol us and we do not control ideas. The Mohamedan idea controls millions, as Mohamedan idea controls millions, as do also the Christian idea, the Buddhist idea, the high tariff idea, the war idea, etc. Were you raised up in a Mohammedan country, coming in contact with nothing else, you would believe the things and be possessed by their ideas. So it is that by continually suggesting to a child or person that such-an-such is a fact, they finally become hypnotized with or by the idea, and believe it until some other idea can come to them in such a way as to gain mastery over the such a way as to gain mastery over the other. Fairness to the Army.

The APPEAL is in receipt of a letter from a soldier, in which he pleads for justice to the army, saying:

soldiers 'killers,' 'murderers,' etc. This, I believe, is entirely uncalled for, as the army is composed of the working class. Our fathers, mothers and brothers are working people, and we ourselves are not in the service because we desire to kill. It is a choice between two evils—the army or the big coporations. I took the former because of the educational advantages it offered, and the service offers inducement for the young man with a roving disposition. Perhaps some day the cause with the "distance of their own property."

With the "distance custor" of the tariff for the last century, what would be worse than useless, but the tariff for the last century, what would be worse than useless, but the tariff for the last control, where the tariff for the last control, which is a subject would be more than useless, but the tariff for the last the would be more than useless, but the tariff so the last the would be more than useless, but the tariff so the last the would be more than useless, but the time of the property of the least. So far from having a choice between serving the corporation and entering the army, when they enter the army they do it that they may serve the corporation and fasten it on the people. The army was recently sent to the Mexican border for no other purpose. Of recent years it has absolutely up function save to serve the There is a difference between the

may be valuable to Socialism. But it will not be in war or in killing. It will be in refusing to shoot down the fellow worker in order that the master of that worker may profit from the sub-jugation. It will be in a concerted movement for peace when a race war for markets or a class war for profits The soldier can do much then,

So our friend is right. The soldier is not to be neglected. He is to be considered as a man succeptible to appeal, temporarily removed from the ranks of the worker in order to keep the worker in his chains but having the worker in his chains, but having every interest with the worker. His business as a soldier is to kill. But his sympathies as a man are to save. As a soldier we condemn him; but as a man, we appeal to him and meet him half way. If the soldiers of the world half way. If the soldiers of the world, will not fight the workers of the world, there will be no wars and no conquests.
We come to the soldier and say, Be our friends and not our enemies-

You will afterward seait with what you want them to That last sentence shows the hook

Let us look at some of the barbs on ne hook. On page 32 of the scout man-al you read: "A Scout is loyal to ual you read: the president, and to his officers, and to his parents, his country and his employers. He must stick to them through thick and thin against anyone who is their enemy or even talks badly about them." The scout movement herein ap-pears as a cunningly devised plan for maintaining the employing system, which is merely a scheme for robbing the workers of much of their products. and so it teaches that a scout must re-fuse to even hear any argument that would inform him of the shame of it. That this is the hook appears from page 35: "One sign of the disease (which was also one of the signs of decay in Rome before her fall) is the horde of tinemployed, leading iniserable, wasted lives in all parts of the country—the great army of drones in our hive."

It is carefully concealed that the only eason there are unemployed is because the robbing capitalist system will not and cannot employ all. Instead of that, the scout is told it is all the result of persuasive power of a few professional gitators.

The object of the scout organization thus becomes apparent. It is to de-fend the system of robbery of the worker by purposely miseducating the working boys so as to keep their own fathers and brothers in practical slavery. You may see this is so if you will look on page 33: "A scout obeys orders without question." He is also

"Taking Possession."

In his speech at the opening of the Roosevelt dam, Theodore Roosevelt expressed himself as proud of having forced through the Panama canal. He be started. said:

"The reclamation act we got through congress; the Panama canal we got with congress tagging a little behind. Things happened to come so in connection with Panama that I had two alternatives before me. One was to write a report with recommendations and put it before congress, so that they might debate it; in which case they would be debating it still and the Panama canal world have been forther of fifty waste. told to be respectful to "superiors."

Nor is this all. The scout is armed and drilled. This means that, under the guise of morals and entertainment and religion, he is to be trained in the POSSESSION OF PANAMA, start POSSESSI art of killing. Killing whom? His the canal, and then torce congress to fellow workers; those who are trying debate me instead of the canal, which to escape from the cruel conditions imposed on the world by the master certain newspapers to the present day, class which you are thus "caught" into upholding.

Now here is a proposition, Friend Now here is a proposition. Friend Meanwhile, the canal is going on." his the canal, and then force congress to

You will notice Roosevelt confesses to "taking possession of Panama." It is precisely what he did. No president had ever done the like before, but Taft has followed the example and "taken possession of the customs receipts of Honduras, and has sent the army to the southern border of the country with the evident purpose of "taking possession" of Mexico. It has been stated that unyou will be able to turn the weapons that are placed in your hands for purpose of subjugating the workers, into means for by May 1st, the invasion of that country will begin.

But remember this. The moment it is discovered that you as a class are

a new era of conquest has dawned. It is a return to the days of the Caesars. It is national robbery by violence. It follows logically the "taking possession" of the lands and resources of America through trickery by the money lords. But how immoral it is! And a new era of co what a spectacle, that an ex-president should boast of "taking possession" of another country! It is a fitting com-panion for the boast of shooting a flee-

ing Spaniard in the back.

But there is a lesson behind it. Socialists have been honestly trying to find a just means of "acquiring pos-session." But what's the use? The session. But what's the use? The masters have set an example in 'taking possession,' and if they go much farther in their madness the despoiled and outraged people will cease to discuss Roosevelt or anything else, and

Socialists at Work

FY A. W. BICKER.

Just before the election a well organized capitalist press bureau circulated through every city where the Socialist seemed to have any chance of election, false and scurrilous attacks on the Socialist administration of Milwaukee. Chief among the allegations made in this anti-Socialist campaign was that Milwaukee contained 25,000 people out of work and that this was due to the Socialist administration having proved a menace to business and discouraged capitalist enterprise. These reports were circulated broadcast in some places like Ft. Scott and Wichita, Kan., where the Socialists were running neck and provided a menace with capitalists were running neck and provided and the socialists were running neck and possible for no more than 370,000 persons to deposit money, the total deposit being \$21.50. The success is so marked that over 300 banks are to be oposited that the deposits are small indicates that the postal savings banks can be made a means of getting the small savings of the many into one fund. The fact that the money deposited with the government is by it turned over to the banks shows that the postal banks may be the means of putting practically all the financial resources of the country in the hands of private banks. Or ultimately of a very more constitution of the success is so marked that over 300 banks are to be oposite were \$133,214. The average deposits were \$133,214.
